

Course Title

Exam Board

**ICT Level 2 Certificate in Digital Applications**  
(Equivalent to 1 GCSE)

**Edexcel**

#### Course Description

This course will help students to engage in learning which is relevant to them and will provide opportunities to develop a range of skills and techniques that will enhance their knowledge of IT and how it can be used to design and make effective digital products for others to use. There are 2 units that students need to study across the course where they will study web development and combining a range of multimedia components into a single product.

Students must complete the following units:

- |                           |                                  |
|---------------------------|----------------------------------|
| 1 Developing Web Products | Practical examination (external) |
| 2 Creative Multimedia     | Summative project (internal)     |

#### Type of Assessment

Students have to pass both units in order to achieve at least a pass grade for the course. Students complete assignments for unit 2 which demonstrates their knowledge and understanding of it. They may be either written or practical or a combination of both. All units are assessed and graded to produce an overall grade for the qualification to be awarded. The actual award gained will depend upon the grade in each unit passed by individual students. Each unit will be awarded a grade of A\* - C. The grade achieved in each unit makes up the final grade.

#### Career and Progression Opportunities

ICT Level 2 Certificate in Digital Applications gives useful preparation for employment opportunities. It supports progression to further study in general qualifications or vocational training.

#### Further Vocational and Academic Qualifications

BTEC Level 3 Qualification in Information Technology or Creative Media Production
