ASPECTS Family Support Team

Your Teen & Drugs

Facts you need to know NOW!

- **Prevent your child getting involved**
- **Signs to look for**
- **Where to go for help**

Come and find out all you need to know about keeping YOUR child safe and what to do if you think they might be involved in substance misuse.

This event is for parents of 11-15 year olds and is delivered by a trained Unplugged© facilitator. The two hour interactive event will focus on facts around substance misuse, different types of drugs and how we can best support our teens and equip them with information to make sensible choices.

You will be aware from newspapers, social media and school communications that there is a growing problem in our local area with more teens becoming involved with the misuse of both legal and illegal substances. Schools work hard to educate pupils about the effects of drugs and how to make sensible, informed choices but our young people need their parents to understand too.

Date: **Tuesday 26th February 2019** **Time:** **7pm –9pm**

This event is free for parents of pupils attending local schools participating in this joint project.
£10 charge for all other attendees
